# Digital tools for teaching

# How do students learn best?

- By talking and discussing
- By writing and reflecting
- By creating and sharing
- By collaborating with others

Digital tools help us offer **more ways for students to participate**.

# Digital tools can support learning

They can help us to:

- increase student participation
- make thinking visible
- support collaboration
- give students creative ways to express ideas
- collect feedback quickly

# Giving every student a voice

In every class:

- Some students like speaking
- Some prefer writing
- Some express themselves visually
- Some need more thinking time

**Digital tools allow multiple ways to participate.**

# Small tools – big impact

You do **not need complicated technology**.
Even very simple tools can help you:

- collect ideas
- check understanding
- organise discussion
- support collaboration

Start **small and simple**!

# Examples of simple digital tools

# Word clouds

Use word clouds to quickly collect student ideas.

Possible tasks:

- What do you already know about the theme / topic?
- What words describe the theme / topic?
- What did you learn today?

Benefits:

- Everyone participates
- The whole group's thinking becomes visible
- Easy starting point for discussion

# Word clouds – possible tools

- AnswerGarden
- WordArt
- Mentimeter
- Wayground
- Slido

# Digital noticeboards

A shared digital board where students can post ideas.

Students can:

- add notes
- comment on others
- vote on ideas
- share images or links

Benefits:

- encourages collaboration
- supports peer feedback
- works for group projects

# Digital noticeboards – possible tools

- Padlet
- Miro
- FigJam

# Quick quizzes and games

Short quizzes can make learning active.

Use them to:

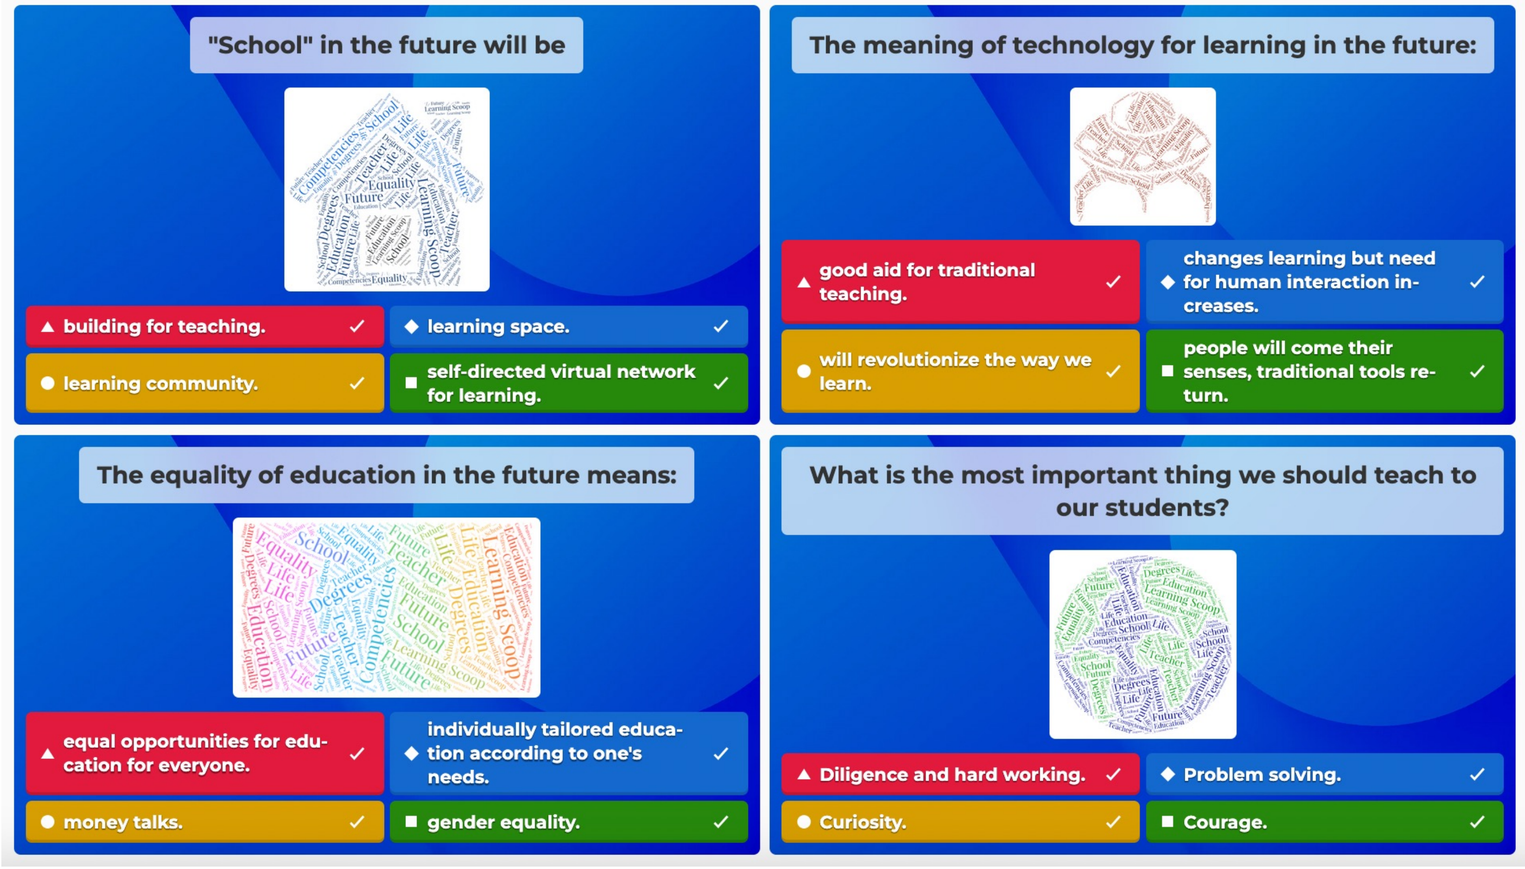
- check understanding
- review previous lessons
- energise the class

Benefits:

- immediate feedback
- fun and motivating
- helps students remember key ideas

# Quick quizzes and games – possible tools

- Kahoot
- Quizizz
- Blooket



# Creative student work

Students can present their ideas
in different formats:

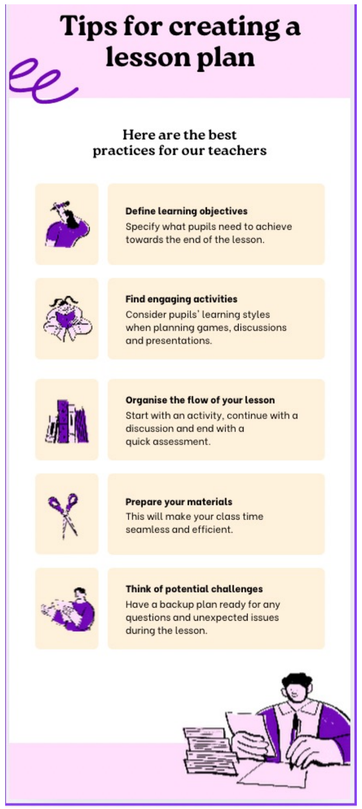
- posters
- infographics
- short videos
- podcasts
- digital timelines

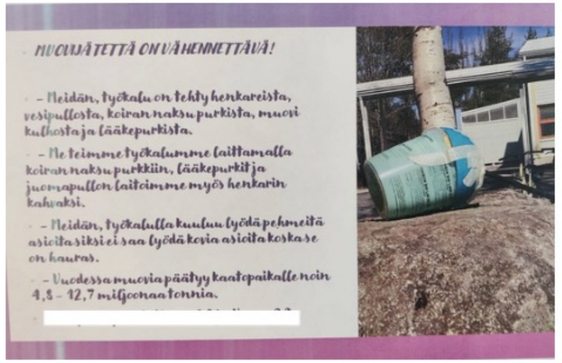
Benefits:

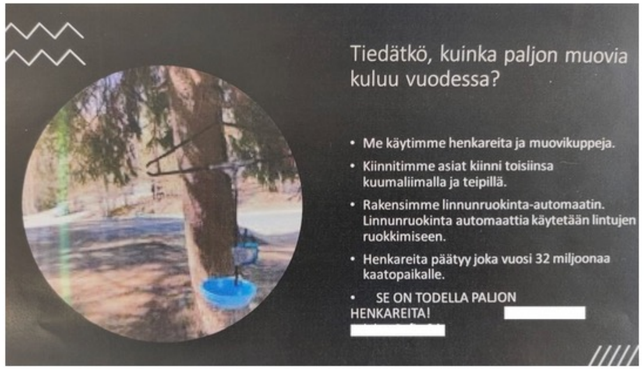
- develops creativity
- strengthens communication skills
- supports multiliteracy

# Creative student work – possible tools

- Canva
- Adobe Express







# Tips for teachers starting with digital tools

# Start simple!

- Try one tool
- Use it in one activity
- Reflect what worked
- Ask students for feedback

- Repeat! 😀
